TOKEN 707
A Platform to Grow Together

About Us

We are UK Based Blockchain Technology Company that has been pioneering innovation in decentralized systems for the past three years and now we have formed a limited company named **Token707 Protocol Ltd.** to enhance our work.

Our team consists of blockchain architects, smart contract developers, and fintech experts dedicated to building **secure, transparent, and profitable blockchain protocols.**

After extensive research, we have successfully developed a **Profitable Protocol** — a unique blockchain-driven mechanism that ensures **profit assurance** for every participant in trading cycles. Unlike traditional crypto projects, where early adopters win and late participants often lose, TOKEN707 is designed to deliver **fair and sustainable profits for all users.**

At the core of TOKEN707 lies its **Profitable & Burnable Token Model**, which reduces supply, increases scarcity, and redistributes profits fairly among participants. By combining **profit-driven tokenomics, deflationary mechanics, and decentralized exchange integration**, TOKEN707 ensures that trading is not only rewarding but also transparent and community-driven.

How all buyers can make profits with TOKEN707

Traditional Crypto		Token 707	
The rate goes up with each buy. For example:		The rate goes up with each buy. For example:	
Early Buyers	Rate \$1	Early Buyers	Rate \$1
1000th Buyer	Rate \$20	1000th Buyer	Rate \$20
The first Buyer can sell their crypto	\$20	The first Buyer can sell their crypto	\$1.35
60% - 70% of Buyers can sell their crypto	Approx \$15 - \$20	Remaining \$18.65	Divided among the remaining pools
30% to 40% of Buyers	Won't make a profit until new Buyers arrive.	60% - 70% of Buyers can sell their crypto	Approx \$1.3 - \$1.21
Gas Fee & Tax	Goes to Creators and Platforms.	Remaining Liquidity	Divided among the remaining pools
		30% to 40% of Buyers	They will get standard profit due to Pool System
		Gas Fee & Tax	Goes to Late Buyers

- According to the algorithm of the Token707 protocol, all buyers can profit even if no new buyers come in after reaching a certain rate, because no buyer is allowed to sell their tokens at the current rate but can only take profit according to their respective pools.

So now every token will give some profit.
